ORTEA®

Three phase stabilisers

- Ratings from 100kVA to 6000kVA
- Phase independent voltage control
- 3 DSP control logic
- **LAN/GPRS communication**

- Advanced network analyzers on input and output for complete AVR monitoring. LED panel for AVR status and alarm monitoring
- Regulator protected by an internal electronic bypass system in case of overheating
- SOFTSTART Circuit (positioning to minimum voltage in case of power failure)
- External LCD display for advanced settings
